

Ross's handy grade computation worksheet

You can calculate your grade anytime by finding the percentage as related to the total possible points. For instance, you have collected 220 points by midterm, out of a possible 250 so far. Divide 220 by 250, and the result is .88, that is, 88 percent. Your grade so far is in the B range.

Say you're not the most organized type. Then use this worksheet to keep track of your grades throughout the semester

Name of Class:

Semester:

Midterm

Total possible points: Your points:

Daily exercises

Total possible points: Your points:

Term paper (if applicable)

Total possible points: Your points:

Group project (if applicable)

Total possible points: Your points:

Final exam

Total possible points: Your points:

Extra credit points:

Add total possible points: **Add** your points:

Divide your points by *total* possible points: divided by equals

Compute grade based on figure in right box: 90-100=A; 80-89=B; 70-79=C 60-69=D Below 60=F.
